

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

City Report for Week Ended Mar. 24, 1917.

During the week ended March 24, 1917, two cases of malaria were reported in Berkeley, Cal.

MEASLES.**Alabama—Birmingham.**

Asst. Epidemiologist Harrington reported that during the month of March, 1917, 1,573 cases of measles, with 21 deaths, were notified in Birmingham, Ala., and that during the period from January 1 to March 31, 1917, 2,908 cases, with 32 deaths, were reported.

California.

The California State Board of Health reported that during the month of March, 1917, at least 3,600 cases of measles occurred in the State of California. During the month of February 3,305 cases were notified and for January 1,606 cases were notified, making a total of over 8,500 cases reported during the first three months of 1917. During the year 1916 there were 4,268 cases reported, and 13,114 cases were reported during 1915.

California—Los Angeles.

Senior Surg. Brooks reported that during the week ended March 31, 1917, 350 cases of measles were notified in Los Angeles, Cal. During the month of March 1,262 cases were reported.

Illinois—Cairo.

Acting Asst. Surg. Barrows reported that during the month of March, 1917, 283 cases of measles were notified in Cairo, Ill. During January 40 cases were reported and in February 275 cases.

MEASLES—Continued.**Washington—Seattle.**

Surg. Lloyd reported that during the period of two weeks ended March 31, 1917, 313 cases of measles, with 1 death, were notified in Seattle, Wash., making a total of 7,549 cases, with 18 deaths, reported since the beginning of the epidemic, February 15, 1916.

RABIES IN ANIMALS.**City Report for Week Ended Mar. 24, 1917.**

During the week ended March 24, 1917, two cases of rabies in animals were reported in Niagara Falls, N. Y.

SCARLET FEVER.

See Diphtheria, measles, scarlet fever, and tuberculosis, page 549.

SMALLPOX.**Illinois—Cairo.**

Acting Asst. Surg. Barrows reported that during the month of March, 1917, 2 cases of smallpox were notified in Cairo, Ill. Two cases were also reported in February.

Massachusetts—Worcester.

Collaborating Epidemiologist Kelley reported that 1 case of smallpox was notified at Worcester, Mass., April 6, 1917.

Minnesota.

Collaborating Epidemiologist Bracken reported that during the week ended April 7, 1917, 3 new foci of smallpox infection were reported in Minnesota, cases of the disease having been notified as follows: Clay County, Spring Prairie Township, 1; Kanabec County, Hillman Township, 1; Marshall County, Warren, 1.

SMALLPOX—Continued.

Ohio—Springfield.

Surg. Fox reported that during the week ended March 31, 1917, 7 cases of smallpox were notified at Springfield, Ohio. Two cases were notified during the preceding week, and for the week ended March 17 four cases were reported.

Ohio—Toledo—Correction.

In the Public Health Reports of March 23, 1917, on page 436, 1 death from smallpox was published as occurring at Toledo, Ohio. The entry should have been in the "Cases" column instead of in the "Deaths" column.

Oklahoma—Okmulgee County Jail.

Asst. Surg. Slaughter reported that during the week ended April 7, 1917, 6 cases of smallpox were notified among prisoners at the Okmulgee County Jail, Oklahoma, making a total of 11 cases recently reported in that institution.

Texas—Galveston.

Surg. Bahrenburg reported that 1 case of smallpox was notified at Galveston, Tex., April 9, 1917.

TYPHUS FEVER.**Texas.**

Senior Surg. Pierce reported that during the week ended March 24, 1917, 2 new cases of typhus fever were notified at El Paso, Tex., making a total of 76 cases reported on the Mexican border since July 1, 1916. During the same week 40,782 persons were inspected at points along the Mexican border. Of this number 4,959 were disinfected for destruction of vermin, and 1,855 were vaccinated. Thirty-two persons were refused admission because of illness.

City Reports for Week Ended Mar. 24, 1917.

During the week ended March 24, 1917, one death from typhus fever was reported in Austin, Tex., and two cases were reported in El Paso, Tex.
